FOR IMMEDIATE RELEASE

CoolScreens to donate products as part of a community fund raising effort for Victoria Bryant State Park, Georgia Parks Service

ALPHARETTA, Georgia (August 5, 2009) As a direct response to recently announced cost reductions in Georgia State Parks, ECC CoolScreens has announced a donation program to directly benefit the parks system. "From August 1, 2009 thru December 31, 2009 CoolScreens will proudly make a donation to the *Friends of Victoria Bryant State Park* for every installation completed" said Mike Winn Managing Director. "These donations will help to fund education and interpretive programs, park maintenance and upgrades to the facilities." he continued.

On May 27, 2009 the Georgia Department of Natural Resources (DNR) announced a restructuring of state parks and historic sites in response to a nearly 39% reduction in state appropriations for the park system and a projected 24% loss of operating revenue for the state's fiscal year starting on July 1, 2009. The restructuring will have a significant impact on parks and historic sites across the state, including:

- Reduction in services and access at five state parks
- Reduction in operational days and/or pursuit of community support at 12 state historic sites.
- Elimination of 12% of the workforce in addition to furloughs for the remaining staff.
- Other, major cost reduction measures.

"Our Georgia State Parks are fantastic, some of the best state parks in the country. We all need to get out and play, to support them, and use them. That is why we are creating this donation program... as a community benefit."

More information is available by contacting Michelle Smith at 770-667-8200 or by emailing her at michelle@CoolScreensGa.com. The company website is located at <http://www.coolscreensga.com>.

ECC CoolScreens, based in Alpharetta, Georgia, develops designs and installs custom solutions to make your living spaces more comfortable throughout the year. Its product lines include porch enclosures, retractable shade and screen systems, energy-saving glass films, security films, and pollen reduction systems. Its service area covers metropolitan Atlanta, north Georgia, and western North Carolina.
